

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner[cite: 4] and MCA postgraduate specializing in Artificial Intelligence, Machine Learning, and Data Science. Hands-on experience developing end-to-end ML models, NLP-driven semantic search engines, and cloud-native observability pipelines on AWS[cite: 3]. Proven track record delivering production-ready web applications for clients alongside practical experience in backend data handling and marketing data analytics.

SKILLS

- Machine Learning & AI:** Supervised/Unsupervised Learning, Deep Learning, GenAI, LLMs, NLP, Vector Search (FAISS), Hugging Face, LangChain, TensorFlow, PyTorch, Scikit-learn
- Data Science & Analytics:** Python, SQL, Pandas, NumPy, Matplotlib, OpenCV, Apache Spark, PySpark, Power BI, Tableau
- Cloud & DevOps:** AWS (EC2, Lambda, S3, CloudWatch, SNS, IAM), Git, GitHub, Linux
- Web & Databases:** MongoDB, Express.js, React.js, Node.js (MERN), REST APIs, PostgreSQL, MySQL, SQLite

WORK EXPERIENCE [Certificate](#)

Full-Stack Web Developer (Freelance) Cybernetrix Group	<i>(July 2023 - August 2023)</i>
- Project: Goa Football Association Official Portal - Architected and developed the official web platform for the Goa Football Association (GFA). - Led core coding, database management, and UI/UX implementation to deliver a production-ready system to the client. - Conducted system integration and quality assurance testing to optimize page responsiveness and application reliability.	
Marketing Intern W Goa	<i>(November 2023 - February 2024)</i>
- Completed 77 days of on-job training within the marketing department - Assisted with promotional data tracking and cross-functional marketing support	
Codtech IT Solutions Pvt. Ltd. - ML Intern	<i>(June 2025 - August 2025)</i>
- Engineered backend logic and data handling workflows for a POS-based hotel billing and order management system - Streamlined transaction data flows to enhance operational efficiency and transaction accuracy	

PROJECTS [Github](#)

Urban Water Quality Prediction Using Ubiquitous Data (Research-Based ML Project)	
- Developed an stMTMV-based predictive model for urban water quality assessment using sensor and ubiquitous data, inspired by IEEE Transactions research. Tech Stack/Tools: ARMA, Kalman Filter, XGBoost, Random Forest, Neural Networks, Python. Impact: Improved prediction accuracy through hybrid statistical modeling and ensemble learning across multi-source environmental datasets.	
QueryTube – AI-Powered Semantic Video Search & Summarization System	
- Built an NLP-driven semantic search engine that processes YouTube transcript data using vector embeddings to retrieve and rank relevant videos. Tech Stack/Tools: Python, Vector Embeddings, FAISS, Ollama (LLM), Cosine Similarity, NLP. Impact: Enabled high-precision query matching and automated LLM-based transcript summarization for improved content discovery.	
Observability and Event Intelligence Pipeline (AWS-Based Project)	
- Developed a cloud-based monitoring system that analyzes application logs in real-time using AWS CloudWatch for anomaly detection and system health tracking. - Implemented an automated alerting mechanism using Amazon SNS to notify users upon detection of critical errors and abnormal patterns. - Integrated AWS Lambda to enable auto-resolution actions such as service restart and error handling without manual intervention. - Built an interactive dashboard using Streamlit to visualize logs, alerts, and system performance metrics. Tech Stack/Tools: AWS CloudWatch, EC2, AWS Lambda, Amazon SNS, Python, Streamlit Impact: Reduced system downtime and manual monitoring efforts by enabling real-time alerting and automated issue resolution.	

EDUCATION

DY Patil International University Master of Computer Applications(MCA); CGPA: 7.2	<i>Pune, India</i> <i>2024 - 2026</i>
St Xaviers College Mapusa Bachelor of Computer Applications(BCA); CGPA: 5.7	<i>Goa ,India</i> <i>2020 - 2023</i>

CERTIFICATIONS AND ACHIEVEMENTS [Certificate Link](#)

- AWS Certified Cloud Practitioner: 2026
- Infosys Natural Language Processing using Python
- Infosys Data Science
- OpenAI Generative Pre-trained Transformer 3 (GPT-3) for developers
